AEMP Dashboard

Bug Fix & Deployment Brief

Head Steward / Claude | Tech Agent / Claude

Project: BT Education Ministry — Applied Education Ministry Platform (AEMP)
Domain: aemp-dashboard.btpma.org
Date: March 2026
Classification: Internal Technical Brief — Authorized Personnel Only

I. Current Production System State

This brief is issued after a successful production cutover and security hardening. The system is live. All bugs listed below are active defects in the deployed environment.

Component	State	Notes
Application URL	✓ LIVE	https://aemp-dashboard.btpma.org
Process Manager	✓ Online	PM2 — aemp-standalone (runs as aemp user, not root)
Database	✓ Clean Baseline	PostgreSQL 14 — db: aemp, user: aemp_user
Users	✓ 2	admin@commandcenter.ai + test member
MinistryCanvas	✓ 1	Applied Education Ministry (Primary) — 508(c)(1)(a)
BacklogItems	✓ 37	All linked to primary canvas
Rocks	✓ 4	All canvasId-linked
Capabilities	✓ 13	Intact
Static Assets	✓ Fixed	npm run build auto-copies to standalone dir
DB Credentials	✓ Secured	~/.pgpass (chmod 600)
Nginx Proxy	✓ Docker	prod-nginx-1 → 172.17.0.1:3000

Backup	✓ Staged	/opt/technology/handoff/aemp_clean_baseline_[timestamp].sql

II. Page & Component Inventory

A. Global Shell (All Pages)

Position	Element	Current Value	Required Value
Header — Left	System Name	AEMP Dashboard	Applied Education Ministry Dashboard
Header — Left	Logo	Small / undersized	Enlarged to spec
Header — Center	Horizontal Nav	Operations / Tech / R&LD / Trust	REMOVE entirely
Header — Right	Org + Role + Profile + Logout	Present	Retain as-is
Primary Nav	Global Tabs	Vision / Inspire / Measure / Impact	Sole navigation authority — no competing nav

B. Vision Page — Strategic Cascade Tab

Component	Position	Status
Canvas Selector	Level 1	✓ Working
KPI Summary Cards (Canvas, Rocks, Capabilities, Features, Enablers)	Level 2	✓ Rendering
Sub-tabs: Canvas (9-Block) / Vision & Traction / Strategic Cascade	Level 3	✓ Present
Button Order: Manage Canvas | + New | + New From Template	Canvas Header	✗ Wrong order
Add Rock Modal — Create Rock Button	Strategic Cascade	✗ BROKEN — does not save
Add Capability Modal — Create Button	Strategic Cascade	✗ BROKEN — does not save

C. Inspire Page

Component	Position	Status
Page Title	Top	✗ Wrong — "Inspire — Executive Summary"

Level 1

Summary Cards (Total, Completed, In Progress, In Review, To Do, Completion %)		✓ **Present**
Overall Ministry Progress Bar	Level 2	✓ **Present**
Team Workspace Cards (Operations, Tech, R&LD, Trust Services)	Level 3	✓ **Present**
Big Room Planning Roll-up Section	Below Summary Cards	✗ **MISSING**
Function Capacity Section (Head of Functions only)	Bottom	✗ **MISSING**

D. Member Portal (Admin View — platform.btpma.org)

Component	Position	Status
Header Scripture Injection	Top-left	✗ **REMOVE — replace with KJV scripture system or remove entirely**
AEMP Dashboard Card Link	Top Cards	✗ **Wrong URL**
Head Steward AI Card Link	Top Cards	✗ **Wrong URL**
Knowledge Vault Card Link	Top Cards	✗ **Wrong URL**
Trust Services Card Link	Top Cards	✗ **Wrong URL**
Profile / Subscriptions / Orders / Settings Tabs	Body	✓ **Present**

III. Bug Fix Inventory — Prioritized

PRIORITY 1 — Critical (Blocking Core Functionality)

BUG-001 — Add Rock: Create Button Does Not Save

Location	Vision → Strategic Cascade Tab → Add Rock Modal
Symptom	Clicking "Create Rock" does not persist the record. Modal may close or remain open with no data saved.
Likely Causes	• Missing or broken API mutation call (POST /api/rocks) • Form state not bound to submit handler • Owner field required but not validated — silent failure • Missing canvasId in payload
Required Payload	`{ title, description, quarter, year, ownerId, canvasId }`
Fix Directive	• Validate POST /api/rocks endpoint is reachable and returns 201 • Bind form state to submit handler • Default ownerId to Admin if no users available • Add toast: "Rock created successfully" on success • Add toast: actionable error message on failure
Test Verification	Create a Rock titled "Q1 Test Rock" → confirm it appears in Strategic Cascade list and in DB: SELECT * FROM "Rock";

BUG-002 — Add Capability: Create Button Does Not Save

Location	Vision → Strategic Cascade Tab → Add Capability Modal
Symptom	Clicking "Create" does not persist the capability record.
Likely Causes	• Missing parentRockId — FK constraint fails silently • Broken form submission binding • API route /api/capabilities not wired or returning error
Required Payload	`{ name, description, parentRockId }`
Fix Directive	• Enforce required: capabilityName + parentRockId • Disable submit button if parentRockId is null • Validate API route /api/capabilities returns 201 • Add success/error toast feedback
Test Verification	

	Create a Capability under "Q1 Test Rock" → confirm it appears nested under the Rock in the cascade view and in DB: SELECT * FROM "Capability";

PRIORITY 2 — High (Navigation & Routing)

BUG-003 — Member Portal: Incorrect Card Routing Links

Location	platform.btpma.org → Member Portal → Top Navigation Cards
Symptom	All four top cards route to incorrect URLs.
Correct URL Mapping	

Card	Correct URL
AEMP Dashboard	https://aemp-dashboard.btpma.org
Head Steward AI	https://platform.btpma.org/head-steward-ai
Knowledge Vault	https://aemp-dashboard.btpma.org/knowledge-vault
Trust Services	https://platform.btpma.org/trust-services

Fix Directive	Update href values in the Member Portal card components. Verify each link resolves correctly in browser.

BUG-004 — Duplicate Navigation System

Location	Global Header — All Pages
Symptom	Horizontal nav (Operations / Technology & Innovation / Research, Learning & Dev / Trust Services) competes with the primary tab navigation (Vision / Inspire / Measure / Impact).
Fix Directive	Remove the horizontal secondary nav entirely from the header. The primary tabs (Vision / Inspire / Measure / Impact) are the sole global navigation authority.
Test Verification	Header should show: Logo | [empty center] | Org + Role + Profile + Logout. No horizontal nav items.

PRIORITY 3 — Medium (UX / Labeling / Semantic)

BUG-005 — Branding: System Name Incorrect

Location	Global Header — All Pages
Current	"AEMP Dashboard" / "Mission Control"
Required	"Applied Education Ministry Dashboard" / "AEMP Dashboard | Mission Control"
Fix Directive	Update the system name string globally. Enlarge the logo to match design spec.

BUG-006 — Inspire Page: Title & Label Incorrect

Location	Inspire Page — Page Title

Current	"Inspire — Executive Summary"
Required	"Inspire — How We Work Together"
Fix Directive	Update the page title string. Retain subtitle: "Aggregated view of all ministry team workspaces."

BUG-007 — Canvas Button Order Incorrect

Location	Vision Page → Canvas Section → Action Buttons
Required Order (Left to Right)	1. Manage Canvas | 2. + New | 3. + New From Template
Fix Directive	Reorder button components to match the required left-to-right sequence.

BUG-008 — Member Portal: Scripture Injection

Location	platform.btpma.org → Member Portal → Header
Symptom	Random scripture text is injected into the header area with no systemic logic.
Fix Directive	Remove the random scripture injection. Replace with either: (a) a curated KJV scripture system tied to the ministry calendar, or (b) remove entirely and leave clean.

PRIORITY 4 — Low (Missing Sections)

BUG-009 — Inspire Page: Missing Big Room Planning Section

Location	Inspire Page — Below Summary Cards
Required	Big Room Planning section that rolls up all Team Workspaces into a unified planning view.
Fix Directive	Add Big Room Planning component below the summary cards. This is a read-only aggregated view of all workspace sprint/backlog data.

BUG-010 — Inspire Page: Missing Function Capacity Section

Location	Inspire Page — Bottom
Required	Function Capacity component — visible to Head of Functions role only.
Fix Directive	Add role-gated Function Capacity section at the bottom of the Inspire page. Only renders if user role = "Head of Functions" or "Administrator".

IV. Execution Order (Non-Negotiable Sequence)

#	Bug ID	Task	Priority	Agent
1	BUG-001	Fix Create Rock API + UI binding	CRITICAL	Tech Agent
2	BUG-002	Fix Create Capability API + validation	CRITICAL	Tech Agent
3	BUG-003	Fix Member Portal routing links	HIGH	Tech Agent
4	BUG-004	Remove duplicate navigation	HIGH	Tech Agent
5	BUG-005	Standardize branding / system name	MEDIUM	Tech Agent
6	BUG-006	Rename Inspire page title	MEDIUM	Tech Agent
7	BUG-007	Fix canvas button order	MEDIUM	Tech Agent
8	BUG-008	Remove scripture injection from Member Portal	MEDIUM	Tech Agent
9	BUG-009	Add Big Room Planning section to Inspire	LOW	Tech Agent
10	BUG-010	Add Function Capacity section (role-gated)	LOW	Tech Agent

V. Final Testing Protocol

Pre-Deployment Checklist (Tech Agent)

Step	Command / Action	Expected Result
1. Build	npm run build	Build completes. Static assets copied to standalone dir.
2. Restart	pm2 restart aemp-standalone --update-env	PM2 shows "online" status.
3. Internal Check	curl -s -o /dev/null -w "%{http_code}" http://localhost:3000/	200
4. Static Assets	docker exec prod-nginx-1 wget -qO/dev/null --server-response http://172.17.0.1:3000/_next/static/chunks/[file].js 2>&1 | grep HTTP/	HTTP/1.1 200 OK
5. DB Integrity	psql -U aemp_user -h localhost -d aemp -c "SELECT COUNT(*) FROM \"Rock\";"	Returns current count (4 baseline)
6. Browser Test	Open https://aemp-dashboard.btpma.org in incognito	Login page renders. No blank page. No 404s in Network tab.

Post-Fix Functional Tests (Head Steward)

Test	Steps	Pass Criteria
Create Rock	Vision → Strategic Cascade → Add Rock → Fill all fields → Create Rock	Rock appears in cascade list. DB count increases by 1.
Create Capability	Vision → Strategic Cascade → Add Capability → Select Parent Rock → Create	Capability appears nested under Rock. DB count increases by 1.
Member Portal Links	Login to platform.btpma.org → Member Portal → Click each card	Each card routes to correct URL without 404.
Navigation	All pages — inspect header	No horizontal secondary nav. Only Vision / Inspire / Measure / Impact tabs visible.
Branding	All pages — inspect header title	"Applied Education Ministry Dashboard" displayed.
Inspire Title	Navigate to Inspire tab	Title reads "Inspire — How We Work Together"

VI. Infrastructure Reference (Tech Agent)

Resource	Value
App Directory	/var/www/aemp
Standalone Server	/var/www/aemp/.next/standalone/aemp/server.js
PM2 Process Name	aemp-standalone
PM2 Home	/var/www/aemp/.pm2
PM2 Service User	aemp (non-root)
Systemd Service	pm2-aemp.service
Nginx Container	prod-nginx-1 (Docker)
App Internal Port	3000
Bridge IP	172.17.0.1
Database	PostgreSQL 14 — db: aemp — user: aemp_user
DB Credentials	~/.pgpass (chmod 600)
Backup Location	/opt/technology/handoff/aemp_clean_baseline_[timestamp].sql
Build Command	npm run build (auto-copies static + public to standalone)
Restart Command	pm2 restart aemp-standalone --update-env

⚠ **Security Note:** The application runs as the **aemp** system user (non-root). Do not restart PM2 as root. Always use: `su -s /bin/bash aemp -c "PM2_HOME=/var/www/aemp/.pm2 pm2 restart aemp-standalone"` or via systemd: `systemctl restart pm2-aemp`

VII. Agent Directives Summary

Head Steward / Claude — Directives

- Oversee execution sequence. Bugs must be fixed in priority order (BUG-001 → BUG-010).
- Authorize each deployment step before Tech Agent proceeds to the next bug.
- Run all post-fix functional tests listed in Section V.
- Confirm DB integrity after each create-action fix (BUG-001, BUG-002).
- Do not authorize production deployment until all CRITICAL and HIGH bugs are resolved and tested.

Tech Agent / Claude — Directives

- Work in the codebase at /var/www/aemp.
- Fix bugs in the sequence defined in Section IV.
- After each fix: run npm run build → pm2 restart → verify 200 response → report to Head Steward.
- Do not modify the database schema without Head Steward authorization.
- Do not alter PM2 configuration or Nginx config without explicit directive.
- All API fixes must be validated against the live DB (aemp) using psql via ~/.pgpass.
