13. Deployment Structure
14. Nginx Configuration

1. Project Overview

The **BTPMA Public Website** at `btpma.org` is the public-facing marketing and information site for the Black Trust Property Management Association. It serves as the primary entry point for prospective members, providing information about services, membership benefits, educational offerings, and organizational mission.

> **Tech Stack:** Next.js 14 (App Router) • React 18 • TypeScript • Tailwind CSS • MDX (for blog) • Framer Motion • next-sitemap • next-seo

Key Objectives

- **Brand Presence:** Professional, trustworthy presentation of BTPMA's mission and values
- **Lead Generation:** Convert visitors into members through compelling CTAs and information
- **SEO Optimization:** High search engine visibility for trust, property management, and community keywords
- **Content Marketing:** Blog with educational articles, news, and thought leadership
- **Performance:** Static generation for fast load times and excellent Core Web Vitals
- **Accessibility:** WCAG 2.1 AA compliance for inclusive access

2. Complete Folder Structure

3. Root Configuration Files

File	Purpose
`next.config.js`	Image optimization domains, redirects, static export settings, MDX support
`tailwind.config.ts`	Brand colors, Playfair Display + Inter fonts, animation utilities
`next-sitemap.config.js`	Auto-generates sitemap.xml and robots.txt for SEO

`contentlayer.config.ts`	MDX content processing: blog posts with frontmatter, reading time, TOC
`.env`	SENDGRID_KEY, MAILCHIMP_KEY, GA_TRACKING_ID, SITE_URL
`package.json`	Scripts: `dev`, `build`, `start`, `postbuild` (sitemap), `lint`

4. Homepage & Public Pages

Homepage — `/`

The homepage is the primary landing page, designed for maximum conversion:

- **Hero Section:** Full-width hero with background video/image, headline, subheadline, and dual CTAs ("Join Now" + "Learn More")
- **Features Section:** 6-card grid highlighting key platform features with icons and descriptions
- **Services Preview:** Horizontal scroll of service cards linking to detail pages
- **Stats Section:** Animated counters showing impact numbers (members, trusts created, courses, etc.)
- **Testimonials:** Carousel of member testimonials with photos and quotes
- **Blog Preview:** Latest 3 blog posts with thumbnails and excerpts
- **Partners Strip:** Logo bar of partner organizations
- **CTA Section:** Full-width call-to-action with membership signup
- **Newsletter Signup:** Email capture form in footer area

Page Rendering Strategy

Page	Strategy	Reason
Homepage	ISR (60s)	Dynamic stats + blog preview, but mostly static
About, Services	SSG	Fully static content, rarely changes
Membership	ISR (300s)	Pricing may update periodically
Blog listing	ISR (60s)	New posts added regularly
Blog posts	SSG + on-demand	Generated at build, revalidated on publish
Contact	SSG	Static form, API handles submission
Legal pages	SSG	Rarely updated MDX content

5. About, Services, Membership & Contact

About — `/about`

- **Mission & Vision:** Organization purpose, goals, and long-term vision
- **History Timeline:** Interactive timeline of BTPMA milestones
- **Leadership Team:** Grid of team members with photos, titles, and bios
- **Core Values:** Illustrated value propositions
- **Impact Stats:** Community impact metrics with animated counters

Services — `/services`

Overview page with cards linking to 5 detailed service pages:

Service	Route	Description
Trust Creation	`/services/trust-creation`	Estate trust directive creation and management
Education	`/services/education`	Online courses and certification programs
AI Assistant	`/services/ai-assistant`	Head Steward AI capabilities and demo
Property Mgmt	`/services/property-management`	Property management guidance and tools
Community	`/services/community`	Member community, forums, and events

Membership — `/membership`

- **Pricing Table:** 3-tier pricing cards (Basic, Premium, Enterprise) with feature highlights
- **Comparison Table:** Detailed feature-by-feature comparison across tiers
- **Membership FAQ:** Accordion with common membership questions
- **CTA:** "Get Started" buttons linking to `platform.btpma.org/signup`

Contact — `/contact`

- **Contact Form:** Name, email, subject, message with validation and reCAPTCHA
- **Contact Info:** Physical address, phone, email, business hours
- **Map Embed:** Google Maps showing office location
- **Social Links:** Links to all social media profiles

6. Blog Structure

Content Management — `content/blog/`

Blog posts are authored as MDX files with rich frontmatter:

```
---
title: "Understanding Estate Trusts: A Complete Guide"
slug: "understanding-estate-trusts"
date: "2026-03-15"
author:
  name: "Dr. James Mitchell"
  avatar: "/images/team/james.webp"
  role: "Chief Education Officer"
category: "Education"
tags: ["trusts", "estate-planning", "wealth-building"]
excerpt: "Learn the fundamentals of estate trusts and how they
         protect your family's generational wealth."
coverImage: "/images/blog/featured/estate-trusts.webp"
featured: true
readingTime: 12
---

# Understanding Estate Trusts

Estate trusts are powerful legal instruments...
```

Blog Routes

Route	Description
`/blog`	Paginated blog listing with featured post hero, search, and category filter
`/blog/[slug]`	Individual post with full MDX rendering, author bio, share buttons, related posts
`/blog/category/[category]`	Posts filtered by category (Education, News, Community, Legal)
`/blog/tag/[tag]`	Posts filtered by tag

Blog Components

- **blog-card.tsx:** Post preview card with thumbnail, title, excerpt, date, and reading time
- **blog-grid.tsx:** Responsive grid layout (3 columns desktop, 2 tablet, 1 mobile)

- **blog-sidebar.tsx:** Categories list, popular tags cloud, newsletter signup, and search
- **blog-post-header.tsx:** Full-width cover image, title, author, date, reading time, category badge
- **blog-post-body.tsx:** MDX renderer with custom components (callouts, code blocks, images)
- **blog-share.tsx:** Social sharing buttons (Twitter, Facebook, LinkedIn, copy link)
- **blog-related.tsx:** 3 related posts based on category and tags

7. Public Components

Header — `components/layout/header.tsx`

- Sticky navigation bar with transparent-to-solid scroll transition
- BTPMA logo (links to homepage)
- Navigation links: About, Services (dropdown), Membership, Blog, Contact
- CTA buttons: "Login" (→ platform.btpma.org/login) and "Join Now" (→ platform.btpma.org/signup)
- Mobile hamburger menu with slide-in drawer

Footer — `components/layout/footer.tsx`

- 4-column layout: About, Quick Links, Services, Contact
- Newsletter signup form
- Social media icons (Twitter, Facebook, Instagram, LinkedIn, YouTube)
- Legal links: Privacy Policy, Terms of Service, Disclaimer
- Copyright notice

Hero Section — `components/home/hero-section.tsx`

- Full-viewport hero with background video or high-quality image
- Animated headline with Framer Motion entrance effects
- Dual CTA buttons with hover animations
- Scroll indicator arrow

Announcement Bar — `components/layout/announcement-bar.tsx`

- Dismissible top banner for promotions, events, or important notices
- Configurable via environment variable or CMS

8. Public Assets & Images

Image Organization

Directory	Contents	Format
`images/hero/`	Full-width hero images for each page	WebP, 1920×1080
`images/about/`	Team photos, mission illustrations	WebP + SVG
`images/services/`	Service feature illustrations	WebP, 800×600
`images/membership/`	Tier icons and comparison graphics	SVG
`images/testimonials/`	Member headshots (circular crop)	WebP, 200×200
`images/blog/`	Blog post covers and thumbnails	WebP, 1200×630
`images/partners/`	Partner organization logos	SVG
`images/icons/`	Custom feature icons	SVG

> **Image Optimization:** All images use Next.js `<Image>` component with automatic WebP conversion, lazy loading, responsive srcsets, and blur placeholders generated at build time.

Video Assets

- `videos/hero-background.mp4` — Muted, looping background video for homepage hero (compressed, ~2MB)
- `videos/intro-explainer.mp4` — 90-second explainer video on the About page

Fonts

- **Playfair Display:** Serif font for headings and hero text (elegant, trustworthy)
- **Inter:** Sans-serif for body text (clean, readable)
- **Geist Mono:** Monospace for code blocks in blog posts

9. API Routes

Method	Endpoint	Description
POST	`/api/contact`	Contact form submission → SendGrid email to admin
POST	`/api/newsletter`	Newsletter signup → Mailchimp list subscription
GET	`/api/blog`	Blog search and filter (query params: q, category, tag, page)

POST	`/api/waitlist`	Membership waitlist signup (name, email, tier interest)
POST	`/api/revalidate`	On-demand ISR revalidation (triggered by admin CMS)

10. SEO & Metadata Strategy

```
// src/app/layout.tsx — Root metadata
export const metadata: Metadata = {
  metadataBase: new URL('https://btpma.org'),
  title: {
    default: 'BTPMA — Black Trust Property Management Association',
    template: '%s | BTPMA',
  },
  description: 'Empowering communities through estate trust creation, '
    + 'education, and property management. Join BTPMA today.',
  keywords: ['estate trust', 'property management', 'wealth building',
             'trust creation', 'financial education', 'BTPMA'],
  openGraph: {
    type: 'website',
    locale: 'en_US',
    url: 'https://btpma.org',
    siteName: 'BTPMA',
    images: [{ url: '/og-image.jpg', width: 1200, height: 630 }],
  },
  twitter: {
    card: 'summary_large_image',
    creator: '@btpma',
  },
  robots: {
    index: true,
    follow: true,
    googleBot: { index: true, follow: true },
  },
};
```

11. Domain-Aware Routing

```
// src/middleware.ts — Public Website
import { NextResponse } from 'next/server';
import type { NextRequest } from 'next/server';

export async function middleware(request: NextRequest) {
  const hostname = request.headers.get('host') || '';
  const pathname = request.nextUrl.pathname;
```

```
  // Redirect www to non-www
  if (hostname.startsWith('www.')) {
    return NextResponse.redirect(
      `https://btpma.org${pathname}`, 301
    );
  }

  // Redirect platform/dashboard subdomains if they hit this app
  if (hostname.includes('platform.btpma.org')) {
    return NextResponse.redirect('https://platform.btpma.org');
  }
  if (hostname.includes('aemp-dashboard.btpma.org')) {
    return NextResponse.redirect('https://aemp-dashboard.btpma.org');
  }

  // Redirect /login and /signup to platform
  if (pathname === '/login') {
    return NextResponse.redirect('https://platform.btpma.org/login');
  }
  if (pathname === '/signup' || pathname === '/join') {
    return NextResponse.redirect('https://platform.btpma.org/signup');
  }

  return NextResponse.next();
}

export const config = {
  matcher: ['/((?!api|_next/static|_next/image|favicon.ico).*)'],
};
```

> **Cross-Domain Links:** The public site's "Login" and "Join Now" buttons link directly to `platform.btpma.org`. The middleware also handles convenience redirects for `/login` and `/signup` paths.

12. Recommendation: Separate Project

> ⚠ **Architecture Recommendation:** The public website (`btpma.org`) should be maintained as a **separate Next.js project** from the admin dashboard and member portal.

Why Separate?

- **Different Concerns:** The public site is primarily static/ISR content focused on SEO and marketing, while the portal and dashboard are dynamic, authenticated applications.
- **Independent Deployment:** Marketing content updates should not require redeploying the member portal or admin dashboard.

- **Performance Optimization:** The public site can be fully static-generated and served via CDN, while the portal requires server-side rendering.
- **Team Separation:** Marketing/content teams can work on the public site without affecting the engineering team's portal work.
- **Security Isolation:** No shared runtime between public-facing content and authenticated member data.
- **Smaller Bundle:** The public site doesn't need Prisma, NextAuth, Stripe, OpenAI, or other portal dependencies.

Shared Resources Strategy

Resource	Approach
UI Components	Private npm package `@btpma/ui` or monorepo workspace
Tailwind Theme	Shared `@btpma/tailwind-config` preset package
TypeScript Types	Shared `@btpma/types` package
Brand Assets	Shared `@btpma/assets` package or CDN
Database	Public site has **read-only** access (blog, events) or uses API

Recommended Monorepo Structure

```
btpma/                          # Turborepo monorepo
├── apps/
│   ├── web/                    # btpma.org (public site)
│   ├── platform/               # platform.btpma.org
│   └── dashboard/              # aemp-dashboard.btpma.org
├── packages/
│   ├── ui/                     # @btpma/ui shared components
│   ├── config-tailwind/        # @btpma/tailwind-config
│   ├── config-typescript/      # @btpma/tsconfig
│   ├── types/                  # @btpma/types
│   └── utils/                  # @btpma/utils
├── turbo.json
├── package.json
└── pnpm-workspace.yaml
```

13. Deployment Structure

```
/var/www/
├── btpma.org/                  # Public website (Next.js)
```

```
│   ├── .next/                    # Production build (mostly static)
│   ├── node_modules/
│   ├── public/
│   ├── content/                  # MDX blog content
│   └── package.json
├── platform.btpma.org/           # Member portal
├── aemp-dashboard.btpma.org/     # Admin dashboard
└── shared/
    ├── ssl/
    │   ├── btpma.org.pem         # Wildcard SSL cert
    │   └── btpma.org.key
    ├── cdn/                      # Shared static assets (optional)
    │   ├── logos/
    │   └── brand/
    └── logs/
        ├── public-access.log
        ├── public-error.log
        └── ...
```

14. Nginx Configuration

```
# /etc/nginx/sites-available/btpma.org

upstream public_site {
    server 127.0.0.1:3000;  # Next.js on port 3000
}

# Redirect www to non-www
server {
    listen 80;
    listen 443 ssl http2;
    server_name www.btpma.org;

    ssl_certificate     /var/www/shared/ssl/btpma.org.pem;
    ssl_certificate_key /var/www/shared/ssl/btpma.org.key;

    return 301 https://btpma.org$request_uri;
}

# HTTP to HTTPS redirect
server {
    listen 80;
    server_name btpma.org;
    return 301 https://$server_name$request_uri;
}

# Main HTTPS server
server {
    listen 443 ssl http2;
```

```
    server_name btpma.org;

    ssl_certificate     /var/www/shared/ssl/btpma.org.pem;
    ssl_certificate_key /var/www/shared/ssl/btpma.org.key;
    ssl_protocols       TLSv1.2 TLSv1.3;
    ssl_ciphers         HIGH:!aNULL:!MD5;

    # Security headers
    add_header X-Frame-Options "DENY" always;
    add_header X-Content-Type-Options "nosniff" always;
    add_header X-XSS-Protection "1; mode=block" always;
    add_header Strict-Transport-Security
               "max-age=31536000; includeSubDomains;
                preload" always;
    add_header Referrer-Policy "strict-origin-when-cross-origin"
               always;

    # Static assets — aggressive caching
    location /_next/static/ {
        proxy_pass http://public_site;
        expires 365d;
        add_header Cache-Control "public, immutable";
    }

    # Public images — long cache
    location /images/ {
        root /var/www/btpma.org/public;
        expires 30d;
        add_header Cache-Control "public";
        try_files $uri @nextjs;
    }

    # Fonts — long cache
    location /fonts/ {
        root /var/www/btpma.org/public;
        expires 365d;
        add_header Cache-Control "public, immutable";
        add_header Access-Control-Allow-Origin "*";
    }

    # API routes
    location /api/ {
        proxy_pass http://public_site;
        proxy_http_version 1.1;
        proxy_set_header Host $host;
        proxy_set_header X-Real-IP $remote_addr;
        proxy_set_header X-Forwarded-For
                         $proxy_add_x_forwarded_for;
        proxy_set_header X-Forwarded-Proto $scheme;

        # Rate limiting for contact/newsletter
        limit_req zone=api_limit burst=5 nodelay;
    }
```

```
    # All other routes
    location / {
        proxy_pass http://public_site;
        proxy_http_version 1.1;
        proxy_set_header Host $host;
        proxy_set_header X-Real-IP $remote_addr;
        proxy_set_header X-Forwarded-For
                         $proxy_add_x_forwarded_for;
        proxy_set_header X-Forwarded-Proto $scheme;

        # Enable gzip for HTML responses
        proxy_set_header Accept-Encoding "";
        sub_filter_once off;
    }

    # Named location for Next.js fallback
    location @nextjs {
        proxy_pass http://public_site;
        proxy_set_header Host $host;
        proxy_set_header X-Real-IP $remote_addr;
    }

    # Rate limiting zone (defined in http block)
    # limit_req_zone $binary_remote_addr
    #     zone=api_limit:10m rate=10r/m;

    access_log /var/www/shared/logs/public-access.log;
    error_log  /var/www/shared/logs/public-error.log;
}
```

> **CDN Recommendation:** For production, place Cloudflare or AWS CloudFront in front of the public site for global edge caching, DDoS protection, and automatic image optimization. The Nginx config above serves as the origin server behind the CDN.
