1. Project Overview

The **Platform Member Portal** at `platform.btpma.org` is the primary member-facing application of the BTPMA ecosystem. It provides authenticated members with access to their dashboard, education courses, the Head Steward AI assistant, estate trust management, and community features.

> **Tech Stack:** Next.js 14 (App Router) • React 18 • TypeScript • Tailwind CSS • Prisma ORM • PostgreSQL • NextAuth.js • Shadcn/UI • OpenAI SDK

Key Features

- **Member Dashboard:** Personalized overview with progress tracking, notifications, and quick actions
- **Education Center:** Interactive courses, video modules, quizzes, and completion certificates
- **Head Steward AI:** AI-powered assistant for trust guidance, legal questions, and property management
- **Estate Trust Directive:** Step-by-step trust creation wizard with document generation
- **Profile Management:** Account settings, subscription management, and document storage
- **Community:** Member directory, forums, and event calendar

2. Complete Folder Structure

4. Authentication Pages — Login & Signup

Auth Route Group — `(auth)/`

The auth route group uses a minimal centered layout without the portal sidebar or header, providing a clean authentication experience.

Page	Route	Description
Login	`/login`	Email/password login with social sign-in (Google, Apple). Includes "Remember me" and forgot password link.
Signup	`/signup`	New member registration with email, name, password. Includes password strength meter and terms acceptance.
Forgot Password	`/forgot-password`	Email input to trigger password reset link via SendGrid.
Reset Password	`/reset-password`	Token-validated password reset form with confirmation.
Verify Email	`/verify-email`	Email verification landing page (auto-verifies via token in URL).
Onboarding	`/onboarding`	3-step wizard: personal info → membership tier → payment.

> **Security:** All auth forms use CSRF tokens, rate limiting on API routes, and bcrypt password hashing. Social login uses OAuth 2.0 via NextAuth.js providers.

5. Member Portal Dashboard

Dashboard Home — `/dashboard`

The member dashboard provides a personalized overview upon login:

- **Welcome Banner:** Personalized greeting with member name and membership tier badge
- **Progress Overview:** Circular progress ring showing overall education completion percentage
- **Quick Actions:** One-click access to AI assistant, continue course, view trust, and community
- **Recent Activity:** Timeline of recent actions (course completions, trust updates, AI chats)
- **Upcoming Events:** Next 3 community events with RSVP status
- **Trust Status Card:** Current trust directive completion status with next steps

6. Education Center

Course Catalog — `/education/courses`

Grid layout of available courses with filtering by category, difficulty level, and duration. Each course card shows thumbnail, title, description, module count, and estimated completion time.

Course Detail — `/education/courses/[slug]`

Full course overview with syllabus, instructor info, prerequisites, and enrollment button. Shows progress bar for enrolled members.

Module Player — `/education/courses/[slug]/modules/[moduleId]`

Interactive content player with:

- Video player with playback controls and speed adjustment
- Module sidebar showing all modules with completion checkmarks
- Text content with rich formatting
- Interactive quizzes with immediate feedback
- Mark as complete button with auto-advance to next module

My Courses — `/education/my-courses`

List of enrolled courses with progress bars, last accessed date, and continue button.

Certificates — `/education/certificates`

Gallery of earned completion certificates with download (PDF) and share functionality.

7. Head Steward AI

Chat Interface — `/ai-assistant`

The Head Steward AI is a conversational assistant specialized in trust law, property management, and BTPMA membership guidance.

- **Chat UI:** Full-screen chat interface with message bubbles, typing indicator, and markdown rendering
- **Suggested Prompts:** Context-aware quick prompts based on member's current activity
- **Streaming Responses:** Real-time token streaming via Server-Sent Events
- **Feedback System:** Thumbs up/down on each response for quality improvement
- **Chat History:** Searchable archive of previous conversations
- **Saved Responses:** Bookmark important AI responses for later reference

```
// AI Chat API Route — src/app/api/ai/chat/route.ts
import { OpenAIStream, StreamingTextResponse } from 'ai';
import { openai } from '@/lib/ai';
import { getSystemPrompt } from '@/lib/ai-prompts';

export async function POST(req: Request) {
  const { messages, memberId } = await req.json();

  const response = await openai.chat.completions.create({
    model: 'gpt-4-turbo',
    stream: true,
    messages: [
      { role: 'system', content: getSystemPrompt(memberId) },
      ...messages,
    ],
    temperature: 0.7,
    max_tokens: 2000,
  });

  const stream = OpenAIStream(response);
  return new StreamingTextResponse(stream);
}
```

8. Estate Trust Directive

Trust Overview — `/trust`

Dashboard showing existing trust directives with status (draft, in-progress, completed, signed), creation date, and quick actions.

Trust Creation Wizard — `/trust/create`

A 5-step guided wizard for creating estate trust directives:

Step	Route	Content
1. Grantor Info	`/trust/create/step-1`	Personal details, contact information, identification
2. Beneficiaries	`/trust/create/step-2`	Add/remove beneficiaries with relationship and share allocation
3. Assets	`/trust/create/step-3`	Property listings, financial accounts, personal property

4. Trustees	`/trust/create/step-4`	Trustee designation, successor trustees, powers granted
5. Review	`/trust/create/step-5`	Full document preview, edit links, generate PDF button

> **State Management:** The trust wizard uses Zustand (`trust-wizard-store.ts`) to persist form data across steps. Data is auto-saved to the server after each step completion.

9. Platform-Specific Components

Component Directory Overview

Directory	Components	Purpose
`components/auth/`	5 components	Login, signup, social auth, password strength, onboarding stepper
`components/dashboard/`	6 components	Welcome banner, progress ring, quick actions, activity feed
`components/education/`	8 components	Course cards, module player, quiz, progress bar, certificates
`components/ai/`	6 components	Chat interface, messages, typing indicator, prompts, feedback
`components/trust/`	7 components	Wizard, step forms, preview, PDF viewer, beneficiary/asset forms
`components/profile/`	4 components	Profile card, edit form, avatar upload, subscription management
`components/community/`	4 components	Member cards, forum posts, event cards, forum editor

10. Shared Components with Admin Dashboard

The following components and utilities are shared between `platform.btpma.org` and `aemp-dashboard.btpma.org` :

Shared UI Primitives

- All `components/ui/` Shadcn components (button, card, dialog, input, etc.)
- Shared Tailwind theme configuration (colors, fonts, spacing)

Shared Utilities

- `lib/prisma.ts` — Same Prisma client connecting to the shared PostgreSQL database
- `lib/utils.ts` — Common utility functions (cn, formatDate, formatCurrency)
- `lib/validations.ts` — Shared Zod schemas for data validation
- `lib/stripe.ts` — Stripe SDK configuration
- `lib/email.ts` — SendGrid email service

Shared Component Patterns

- `components/shared/data-table.tsx` — Same data table with sorting, filtering, pagination
- `components/shared/file-upload.tsx` — Drag-and-drop file upload with preview
- `components/shared/pagination.tsx` — Consistent pagination controls
- `components/shared/status-badge.tsx` — Color-coded status indicators

> **Recommendation:** Consider extracting shared components into a private npm package (`@btpma/ui`) or a monorepo workspace to ensure consistency and reduce duplication across projects.

11. Domain-Aware Routing

```
// src/middleware.ts — Platform Member Portal
import { NextResponse } from 'next/server';
import type { NextRequest } from 'next/server';
import { getToken } from 'next-auth/jwt';

export async function middleware(request: NextRequest) {
  const hostname = request.headers.get('host') || '';
  const pathname = request.nextUrl.pathname;

  // Enforce platform.btpma.org domain
  if (!hostname.includes('platform.btpma.org')
      && !hostname.includes('localhost')) {
    return NextResponse.redirect('https://btpma.org');
  }

  // Public routes (no auth required)
  const publicRoutes = ['/login', '/signup', '/forgot-password',
                        '/reset-password', '/verify-email'];
```

```
  if (publicRoutes.some(route => pathname.startsWith(route))) {
    return NextResponse.next();
  }

  // Protect all portal routes
  const token = await getToken({ req: request });
  if (!token) {
    return NextResponse.redirect(
      new URL('/login', request.url)
    );
  }

  // Check onboarding completion
  if (!token.onboardingComplete && !pathname.startsWith('/onboarding')) {
    return NextResponse.redirect(
      new URL('/onboarding', request.url)
    );
  }

  // Check subscription status
  if (token.subscriptionStatus === 'expired'
      && !pathname.startsWith('/profile/subscription')) {
    return NextResponse.redirect(
      new URL('/profile/subscription', request.url)
    );
  }

  return NextResponse.next();
}
```

12. Deployment Structure

```
/var/www/
├── platform.btpma.org/           # Member portal (Next.js)
│   ├── .next/                    # Production build output
│   ├── node_modules/
│   ├── public/
│   ├── prisma/

    ├── ssl/
    │   ├── btpma.org.pem
    │   └── btpma.org.key
    ├── uploads/                  # Shared file uploads
    │   ├── avatars/
    │   ├── documents/
    │   └── course-media/
```

```
    └── logs/
        ├── platform-access.log
        ├── platform-error.log
        └── ...
```

13. Nginx Configuration

```
# /etc/nginx/sites-available/platform.btpma.org

upstream platform_portal {
    server 127.0.0.1:3002;  # Next.js on port 3002
}

server {
    listen 80;
    server_name platform.btpma.org;
    return 301 https://$server_name$request_uri;
}

server {
    listen 443 ssl http2;
    server_name platform.btpma.org;

    ssl_certificate     /var/www/shared/ssl/btpma.org.pem;
    ssl_certificate_key /var/www/shared/ssl/btpma.org.key;
    ssl_protocols       TLSv1.2 TLSv1.3;
    ssl_ciphers         HIGH:!aNULL:!MD5;

    # Security headers
    add_header X-Frame-Options "SAMEORIGIN" always;
    add_header X-Content-Type-Options "nosniff" always;
    add_header X-XSS-Protection "1; mode=block" always;
    add_header Strict-Transport-Security
               "max-age=31536000; includeSubDomains" always;
    add_header Content-Security-Policy
               "default-src 'self'; script-src 'self' 'unsafe-inline'
                https://js.stripe.com; frame-src https://js.stripe.com;"
               always;

    # File upload size limit
    client_max_body_size 50M;

    # Static assets
    location /_next/static/ {
        proxy_pass http://platform_portal;
        expires 365d;
        add_header Cache-Control "public, immutable";
    }
```

```
    # Uploaded files (served directly by nginx)
    location /uploads/ {
        alias /var/www/shared/uploads/;
        expires 30d;
        add_header Cache-Control "public";
    }

    # API routes with WebSocket support (for AI streaming)
    location /api/ {
        proxy_pass http://platform_portal;
        proxy_http_version 1.1;
        proxy_set_header Upgrade $http_upgrade;
        proxy_set_header Connection "upgrade";
        proxy_set_header Host $host;
        proxy_set_header X-Real-IP $remote_addr;
        proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
        proxy_set_header X-Forwarded-Proto $scheme;
        proxy_read_timeout 300s;  # Longer timeout for AI streaming
        proxy_buffering off;      # Disable buffering for SSE
    }

    # All other routes
    location / {
        proxy_pass http://platform_portal;
        proxy_http_version 1.1;
        proxy_set_header Host $host;
        proxy_set_header X-Real-IP $remote_addr;
        proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
        proxy_set_header X-Forwarded-Proto $scheme;
    }

    access_log /var/www/shared/logs/platform-access.log;
    error_log  /var/www/shared/logs/platform-error.log;
}
```

> **Key Differences from Admin Dashboard:** The platform Nginx config includes a larger `client_max_body_size` for file uploads, longer proxy timeouts for AI streaming, disabled buffering for Server-Sent Events, and a Content-Security-Policy header allowing Stripe's JavaScript.
